Clamps for Pedestal Bases (PST). Used in combination with a Pedestal, the Pedestal can be freely positioned and secured on a vibration isolator or laboratory bench.

- The PSC-10 is used in pairs, for clamping a Pedestal at two positions, and the PSCA / PSCS is used for clamping at a single position.
- Since there is a long hole in the PSCA / PSCS, it is possible for coarse adjustment of the horizontal direction.
- After alignment, tighten the attached M6 screw to secure the Pedestal.
